DHIVYA D

GENERATIVE AI ENGINEER

Chennai, India | +91 8098531668 | dhivyad816@gmail.com | linkedin.com/in/dhivya-devanathan | github.com/Dhivya-deva

PROFESSIONAL SUMMARY

Generative AI Engineer with a Bachelor of Technology in Information Technology and hands-on industry experience developing LLM-driven applications, prompt engineering workflows, and retrieval-augmented generation (RAG) pipelines. Proficient in Python and core Generative AI and NLP techniques, complemented by a solid foundation in full-stack development and UI/UX design principles. Demonstrated ability to translate complex business requirements into scalable, intelligent solutions through research, experimentation, and effective cross-functional collaboration.

TECHNICAL SKILLS

Generative AI / ML: Large Language Models (LLMs), Prompt Engineering, Retrieval-Augmented Generation (RAG), NLP, Vector Databases

Programming Languages: Python

Design Tools: Canva

INTERNSHIP EXPERIENCE

Testleaf Software Solutions, Chennai, India *Sep 2026 – Dec 2026*

Generative AI Intern

- Designed and developed GenAI-powered application features using large language models (LLMs), including prompt engineering and output evaluation to improve response accuracy.
- Built and tested retrieval-augmented generation (RAG) pipelines to integrate domain-specific data with LLM outputs, improving contextual relevance of responses.
- Collaborated with the engineering team to debug, document, and optimize AI workflows, and researched emerging GenAI tools and frameworks to recommend improvements.

Cloud Logic Technologies, Puducherry, India *Jun 10 – Jun 21, 2024*

Web Development Intern

- Developed and maintained responsive web pages using HTML, CSS, and JavaScript, ensuring cross-browser compatibility and adherence to design specifications.
- Assisted in building and testing front-end components, fixing bugs, and integrating basic back-end functionality under senior developer guidance.
- Participated in code reviews and version control practices to maintain clean, maintainable codebases.

Kosoft, Puducherry, India *Dec 30, 2024 – Jan 13, 2025*

UI/UX Design Intern

- Created wireframes, mockups, and interactive prototypes in Figma based on user research and stakeholder requirements, then refined layouts through usability reviews and developer collaboration.

PROJECTS

AI Resume Screening Assistant

- Built an AI-powered tool that automatically parses resumes, extracts key candidate information (skills, experience, education), and matches profiles against job descriptions using NLP and LLM-based scoring.
- Implemented ranking logic to shortlist candidates based on relevance score, reducing manual screening effort and improving consistency in initial candidate evaluation.
- Built the pipeline in Python, using vector embeddings for similarity-based matching and prompt engineering to guide the LLM's scoring logic.

AI QA Bot

- Developed a question-answering chatbot that uses a retrieval-augmented generation (RAG) pipeline to answer user queries accurately from a custom knowledge base/document set.
- Integrated vector-based document retrieval with an LLM to generate context-aware, accurate responses, and designed a simple interface for real-time user interaction.
- Built the ingestion pipeline in Python, chunking documents and storing vector embeddings in a vector database, then tuned retrieval and prompt parameters to improve answer relevance.

EDUCATION

IFET College of Engineering, Villupuram *May 2026*

Bachelor of Technology, Information Technology — CGPA: 7.8 / 10

CERTIFICATIONS

- Introduction to Networking — Cisco
- Arduino Programming — PTU (ATAL)
- Generative AI Workshop — SIMATS

LANGUAGES

English — Full Professional Proficiency | Tamil — Native / Bilingual Proficiency
