# MADHUMITHA M

## GEN AI DEVELOPER

Chennai, Tamil Nadu | +91 9597612053 | mxdhumitha11@gmail.com | LinkedIn | GitHub | Portfolio

## PROFESSIONAL SUMMARY

Computer Science Engineering graduate with hands-on experience developing web and AI-based applications using Generative AI, LLM APIs, JavaScript, React.js, REST APIs, and MongoDB. Strong foundation in LLM fundamentals, prompt engineering, retrieval-augmented generation (RAG) fundamentals, AI application development, data structures and algorithms, object-oriented programming, and problem solving. Experienced in API integration, responsive UI development, application data management, and debugging, with a strong interest in Generative AI, LLM application development, and AI-powered software solutions.

## TECHNICAL SKILLS

**Generative AI:** Generative AI, LLM Fundamentals, LLM API Integration, Prompt Engineering, RAG Fundamentals, AI Application Development
**Programming Languages:** Java, JavaScript, Python (Basics)
**Frontend:** React.js, HTML5, CSS3, Responsive Web Design
**Backend & APIs:** REST APIs, API Integration
**Database:** MongoDB
**Core Computer Science:** Data Structures and Algorithms, Object-Oriented Programming, Problem Solving, Debugging
**Tools:** Git, GitHub, Postman, Visual Studio Code

## INTERNSHIP EXPERIENCE

**Unified Mentor, Remote** *Jun 2024 – Aug 2024*
*Web Development Intern*

- Developed responsive web interfaces using HTML5, CSS3, JavaScript, and React.js.
- Integrated REST APIs to retrieve and display application data and developed reusable React.js components.
- Performed debugging and testing to resolve application issues and improve functionality and user experience.

**CodeBind Technologies, Chennai** *May 2023*
*In-Plant Trainee*

- Developed responsive web pages using HTML5, CSS3, and JavaScript.
- Applied JavaScript programming and DOM manipulation concepts in application development.
- Assisted with debugging, testing, troubleshooting, and software development activities.

## PROJECTS

**AI-Based Grievance Management System** | *React.js, Node.js, Express.js, MongoDB*

- Developed a full-stack AI-based grievance management system to allow users to submit, track, and manage complaints.
- Built REST APIs, authentication, and role-based access control for users and administrators, with MongoDB for managing grievance and user data.
- Applied AI concepts to support intelligent grievance management and improve complaint handling and application workflow.

**Resume Builder Application** | *React.js, JavaScript, HTML5, CSS3*

- Developed a responsive Resume Builder application with dynamic forms for users to enter and manage resume information.
- Implemented React state management, real-time preview, form validation, and error handling for an interactive resume-building experience.
- Designed reusable React.js components and a responsive UI for maintainable and user-friendly development.

**Weather Forecasting Application** | *React.js, JavaScript, REST API, HTML5, CSS3*

- Developed a responsive weather forecasting application to provide weather information based on user-selected locations.
- Integrated a REST API and handled API responses to display temperature, weather conditions, humidity, and forecast information dynamically.
- Designed a responsive, user-friendly interface with appropriate API data handling and error management.

## EDUCATION

**C. Abdul Hakeem College of Engineering and Technology** *2022 – 2026*
*Bachelor of Engineering, Computer Science Engineering — CGPA: 8.53*
