SHREENIDHI S

GENERATIVE AI DEVELOPER

Pondicherry | +91 8903690011 | shreenidhis2k4@gmail.com | www.linkedin.com/in/shreenidhi27 | ShreenidhiS27

PROFESSIONAL SUMMARY

Generative AI enthusiast and B.Tech Information Technology student with hands-on internship experience in building LLM-based applications using Python, RAG, Prompt Engineering, and LangFlow. Experienced in developing QA Bots and Resume Assistants with document processing, embeddings, and retrieval workflows. Strong interest in Generative AI and AI application development, with good problem-solving, communication, and teamwork skills.

TECHNICAL SKILLS

Languages & Data: Python

AI / ML: Generative AI, Machine Learning, Large Language Models (LLMs)

GenAI: RAG, Prompt Engineering, Embeddings

Frameworks & Tools: LangFlow, VS Code, MS Word, GitHub

INTERNSHIP

Generative AI Intern — Testleaf Software Solutions Pvt. Ltd. *Sep 2026 - Dec 2026*

Chennai

- Developed LLM-based applications using Python, Generative AI, RAG, Prompt Engineering, and embeddings, and LangFlow for document-based question answering and resume analysis.
- Developed a RAG-based QA Bot by implementing document processing, text splitting, embeddings, document retrieval, and context-based response generation using LLMs.
- Developed an LLM-based Resume Assistant using prompt engineering to analyse resume content and generate relevant, context-aware feedback.
- Designed and integrated AI workflows involving document processing, embeddings, retrieval, prompt configuration, and LLM response generation using LangFlow.
- Built, tested, and troubleshot AI application workflows, refining prompts and retrieved context to improve the quality and relevance of generated responses.

PROJECTS

QA Bot – RAG-Based Question Answering System

Technologies: Python, RAG, LLM, Embeddings, LangFlow

- Developed a RAG-based question-answering chatbot using Python and LangFlow.
- Implemented document processing, text splitting, embeddings, and document retrieval for context-aware responses.
- Integrated retrieved document context with an LLM to generate answers.
- Designed and tested the complete RAG workflow, including retrieval and prompt configuration.
- Troubleshot and refined prompts to improve the quality and relevance of generated responses.

Resume Assistant – LLM-Based Resume Analysis

Technologies: Python, LLM, Prompt Engineering, LangFlow

- Developed an LLM-based resume analysis application using Python and LangFlow.
- Designed prompt-engineering workflows to analyze resume content and generate targeted feedback.
- Built an AI workflow for document processing, information extraction, and response generation.
- Tested and refined prompts based on generated-output quality and relevance.
- Applied LLM concepts to automate resume analysis and recommendation generation.

EDUCATION

B.Tech, Information Technology — Manakula Vinayagar Institute Of Technology *2022 - 2026*

CGPA: 7.4 / 10

CERTIFICATIONS

- Python — Rudo Technology Pvt.Ltd (Aug 2024 – Oct 2024)
- AWS Cloud Computing — AWS Academy (June 2025)

ACHIEVEMENTS

- Certificate Of Excellence - 7th IEEE International Conference.
- Third Prize in Poster Presentation Competition on "Innovation and Strategies of Engineering Sector in the Field of Food Technology."

LANGUAGES

English — Full Professional Proficiency | Tamil — Proficiency
